

# Proposed Miami Bridge Improvements

## Alternative Transportation Solutions

MoDOT will provide a detour route for an alternate Missouri River crossing during construction. MoDOT has also explored the feasibility of various alternate transportation services during the bridge closure.

Our public involvement to date indicates that the commuting public (primary users of the Miami Bridge) desires **reliable** alternate transportation during the bridge closure.

**The Services listed below have been extensively researched:**

<u>Service</u>	<u>Cost</u>	<u>Key Considerations</u>
1) Shuttle Service	\$0.35 Million	Very Reliable
2) Ferry Service	\$3.50 Million	Shallow Draft Waterway
3) Amphibious Vehicle	\$0.25 Million	Swift Current

**Another innovative option that has been researched:**

<u>Facility</u>	<u>Cost</u>	<u>Key Considerations</u>
Three Commuter Lots	\$0.375 Million	<b>Long-Term Benefit</b>

**Other options that have been investigated:**

Commercial Bus Service  
OATS, Inc. Service  
Private Watercraft
